

PSS-Europe

A Project Service Solutions Company

Introduction

PSS-Europe provides quality solutions through the methodical application of business analysis and project management.

We want to understand your business challenge and provide you with a solution that is practical, achievable and tailored to the specific needs of your business.

PSS-Europe solutions range from focusing on gaining improvements from your existing investments to implementing leading edge technology.

Please take a moment to review the issues we have faced, the skills brought to bear, and the solutions developed. Then contact us for a review of your current challenge.

PSS-Europe is a multi disciplinary consultancy and service provider delivering innovative business solutions. The company is focused on delivering world-class solutions whilst maintaining the highest standards of intellectual endeavour

Business Issues

Common issues found in today's business

- scope creep causing budget issues?
- deadlines that do not look realistic any more?
- third party management a drain on resource?
- need to manage multiple projects at multiple sites?
- lacking project methodology?
- good business managers not as good when running a project?
- frustrated by lack of progress?

Our business is solving problems like these.

PSS-Europe consultants have been selected based on their ability to successfully deliver business solutions.

The use of a straightforward base methodology applied with 'common sense' provides the core of the approach. All work is structured to provide working materials to manage business solutions within the customers' parameters.

We are independent from any hardware or software vendors and not a subsidiary of any other consultancy. Our only interest is in providing the best solution to our customers and leaving them better prepared to address similar issues in the future.

From simply providing business analysis resource to managing the implementation of large global projects **PSS-Europe** has the expertise available.

- full project lifecycle management from conception to implementation.
- defining and supporting the companies strategy.
- analysing the situation and defining the options.

Skills

A dynamic and innovative consultancy

- programme management
- portfolio management
- project management
- business analysis

PSS-Europe is a business process focused consultancy, if the solution requires specialist in a particular function then we will source them for you too.

Each of the principal consultants have been working in a core skill role either in consultancy or a business area for over fifteen years. Responsible for programme management of the development and implementation of pan European projects to running a small one off practical prototype pilot.

Qualified and experienced in leading methodologies we can easily adopt your own methodology or work with you to install best practice in your industry.
